**Period for Reply**

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

## **DETAILED ACTION**

### ***Drawings***

The drawings are objected to because:

In Figs. 1 – 5, the items contained need to contain a text label. It is office policy to request from applicants that submitted figures contain both text and numerical labels to allow individuals viewing each figure to be able to determine the designation of each element in the figure without having to go into the specifications.

The drawings are objected to as failing to comply with 37 CFR 1.84(p)(5) because they do not include the following reference sign(s) mentioned in the description: The specification, in page 4 lines 27 – 29, discloses “Returning now to Fig. 2, both the truth clock signal and the quadrature clock signal are provided to a clock distribution network 27”. However, figure 2 does not show a “clock distribution network 27”. Corrected drawing sheets in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. Each drawing sheet submitted after the filing date of an application must be labeled in the top margin as either “Replacement Sheet” or “New Sheet” pursuant to 37 CFR 1.121(d). If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

A proposed drawing correction or corrected drawings are required in reply to the Office action to avoid abandonment of the application. The objection to the drawings will not be held in abeyance.

### ***Claim Objections***

Claims 1 – 9 are objected to because of the following informalities:

In claim 1, lines 2, 6, 9, and 10 recite the “CMU” and lines 5, 8, and 13 recites “CRU” should have been “Clock Master Unit (CMU)” and “Clock Recovery Unit (CRU)” respectively, where the abbreviations “CMU” and “CRU” were not defined in the claim.

Similar informalities were found in claim 2, line 1, claim 3, line 3, claim 6, line 1, claim 7, line 6, 8 and 10, claim 8, line 2, and claim 9, line 2.

Claim 4 and 5 are being objected because of depend on an objected claim.

Appropriate correction is required.

### ***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claim 10 is rejected under 35 U.S.C. 102(e) as being anticipated by Naven et al. (US 2002/0067787).

Regarding claim 10, Naven et al. teach clock generation system having means for generating multiple out-of-phase clock signals, the clock signals, being approximate a predetermined frequency, means for producing a recovered clock signal, musing at least two of the clock signals generated by the means for generating multiple out-of-phase clock signals, the recovered clock signal having a selectively variable phase and a frequency approximate the frequency of the multiple out of phase clock signals (page 3, paragraph 30, lines 2 – 11).

### ***Allowable Subject Matter***

Claims 1 – 9 are allowable over prior art of record if rewritten to overcome the objections explained in above paragraphs.

Claims 11 – 14 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

### ***Conclusion***

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Jaison Joseph whose telephone number is (571) 272-6041. The examiner can normally be reached on M-F 8:30 - 5.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Stephen Chin can be reached on (571) 272-3056. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.
